25X1

Iran: [The Shah and a party of 19 left for an official visit to Norway on 17 May, and he is expected to be out of the country for about a week. Before leaving, the Shah appointed a regency council to rule in his absence consisting of Prime Minister Amini and Minister of Court Ala, and two members of the royal family, Prince Gholam Reza and Prince Abdol Reza.]

25X1

25X1 25X1

[Princess Ashraf, the Shah's twin sister, is reported to have left Iran on 14 May. Some of the royal family, particularly the two princes on the regency council, will presumably remain in Tehran at least until the Shah returns from Norway. Some of the Shah's unpopularity results from the intrigues and financial manipulations of the royal family, and their elimination from the scene would help further the image of a reformed government which Amini is attempting to create.]

25X1

[The Watch Committee at its meeting on 17 May reached the following conclusion concerning Iran:]

[The implementation of reforms by the Amini government will at least temporarily result in a period of increased political instability. The opportunity for reaction to these reforms may be enhanced during the absence of the Shah.]

Note: [While the Director of the Bureau of Intelligence and Research, Department of State, and the Director for Intelligence, The Joint Staff, agree that there is a continuing danger of a military coup in Iran, they do not believe that this danger is as great as it was several weeks ago or that it is materially accentuated by the absence of the Shah on a brief trip to Europe.]

25X1

25X1

Iraq - Oil: [Prime Minister Qasim apparently views recent conciliatory moves by the Iraq Petroleum Company (IPC) to resume negotiations as indicating company weakness. He may now attempt to enforce his government's demands for more revenue and part ownership of the company. Qasim responded to IPC Board Chairman Lord Monckton's personal letter of 30 April by publicly castigating "the avaricious, monopolist-imperialist companies which suck the blood and wealth of the]

[peoples] and which fear losing "the wealth upon which they have preyed for a number of years." The IPC appealed to the British Foreign Office for assistance on 9 May.

Jordan: [There is continuing ferment in Jordan as a result of King Husayn's engagement to an Englishwoman, but talk of wholesale cabinet resignations and of widespread disaffection within the army has abated. The King's supporters have discontinued their efforts to get him to change his mind in view of his determination to carry out his plans. A newly organized Royal Armored Force commanded by the King's uncle, Sharif Nasir, probably will be able to control any disturbances that might develop at the time of the wedding, on or about 25 May. Anti-regime political elements like the Baath party now apparently favor the marriage because of the ultimate advantage it could afford them.]

19 May. If this space ship passes within about 60,000 miles of Venus, as Moscow claims it will, it will be a major technical achievement. The USSR admitted several months ago, however, that no communications had been received from the probe during the regular transmission period on 27 February, and Moscow's silence on the subject thereafter suggests that no further communications have been received. The USSR may therefore have no way to confirm the probe's trajectory. The contribution of this space operation to scientific knowledge of Venus and its environment will be nil unless communications can be re-established. Soviet descriptions and photographs indicate that the probe is equipped with directional long-range communications equipment. Despite the failure to communicate at relatively close range, the USSR may be able to reactivate this equipment as the vehicle reaches the vicinity of Venus.
